WORK EXPERIENCE

· June 2016 – September 2017 (1 year and 3 months): **Full-Stack Web Developer** in **"Brújula Tecnologías de la Información"**, working remotely full-time with only one client: **"eDreams Odigeo"**, integrated in one of its Front-end development teams.

We followed Kanban, an Agile Methodology. I performed maintenance and development of new products for the eDreams site, in a fast iterative process with A/B tests. I worked with Javascript (Backbone framework) in the Front-End and with Java in order to receive the data from the API, in desktop as well as mobile versions of eDreams. I developed and fixed automatic tests with Cucumber (as well as unit tests with Java), that covered the web functionality. I improved its efficiency too, refactoring legacy code.

· March 2016 – May 2016 (3 months, in my studies curriculum): **Training as Web Developer** in **"Kamaylon".**

I developed a PHP web, using a Wordpress template that I modified in order to implement a Masonry gallery, sliders, filters, Google Maps pluggin, Twitter… I created custom postypes to adapt the web content to the client needs, so that way all content would be dynamic and the client would be able to modify them themselves.

At the same time, as my studies final project, I developed a Hybrid App for Android and IOs in my free time, using Ionic framework (which implements Angular.js). I created a Lumen API (Laravel) too, that would send data in JSON format from a Database in a server.

· May 2015 – September 2015 (5 months, while studying): **Python Junior Developer** in **"Madisa Palma".**

My main assignment was to start a web app project: a web for selling tickets, which generated QR codes and sent them via email and received data from a Web Service developed in parallel by other team in the company. The app was responsive and implemented jQuery as well as Bootstrap.

Another of my assignments was to develop Python modules for "gsBase" ERP, in addition to install it in client computers and explain them how to use it.

PROGRAMMING SKILLS

Test Driven Development

Agile Methodologies: Kanban

Languages: Javascript (ES6), Java (SE8), Python, PHP.

Web Development: HTML5 (Bootstrap), CSS3 (SASS).

JS frameworks: Backbone, JQuery, Node, AngularJS.

PHP frameworks: Wordpress, Lumen API (Laravel).

Testing: Selenium, Guerkins, Cucumber.

Mobile: Native Android, Hybrid Apps (Ionic).

ERP: OpenERP (Odoo), gsBase.

Database: Oracle SQL, MySQL.

OTHER SKILLS

English: B2 level. 10 months working in England. Studied "English for Health and Behavioural Sciences" subject in the University of the Balearic Islands, which is equivalent to a B2 level.

Spanish: Native level.

Catalan: Native level, C level accredited by "Conselleria d'Educació" from Balearic Islands.

B driving license. Own a car.

EDUCATION

2014 – 2016: **Certificate of Higher Education (HNC) in Crossplatform Apps Development** ("Ciclo Superior de Desarrollo de Aplicaciones Multiplataforma"), IES Borja Moll (Majorca)**.**

PAST WORK EXPERIENCE

- November 2013 - September 2014 (10 months): Ward Nurse in Bedford Hospital, England.

- Nursing Degree ("Grado de Enfermería"), University of the Balearic Islands: 2009 - 2013.

AVAILABILITY

I'm interested in a remote full-time work position.
